

3DFS-Composer

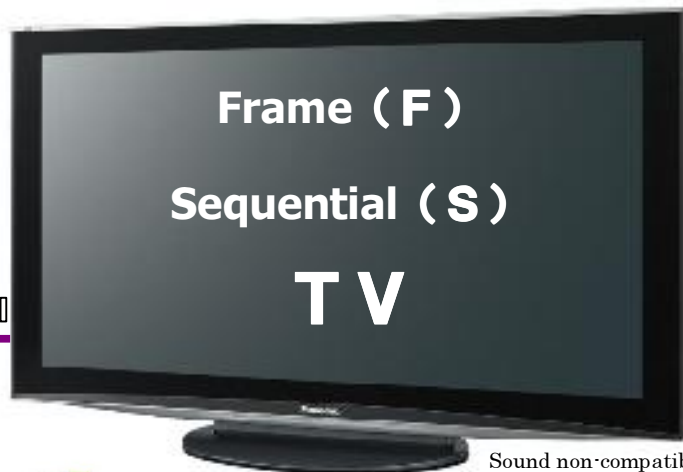

(Frame)(Sequential)

3D picture composed of 2 signals of HD-SDI (L channel and R channel) can be seen with Panasonic and SONY 3DTV, MITSUBISHI LASERVUE.

What is FS-Composer?

FS Composer is the equipment which converts a 2 L/R input video signals to frame (F) sequential (S) 3DTV as HD 3D video signal. It is possible to enjoy 3 dimensional picture by setting using frame (F) sequential (S) 3DTV in Side By Side. The input format is the 4:2:2 format of 1080 60i and 1080 59.94i (automatic detection).
